

BORDEN COMPANY HOUSE

AL-V-A-046
Main Street, Shaft
ca. 1850

The Borden Company House consists of a one and a half story, three bay wide, rectangular shaped facade with a one story wing on the rear side. The house is one of a number of "company" houses built by the Borden Mining Company in the mid 19th century. Similar to other towns and villages in the George's Creek area, the town of Borden Shaft was a company town. However, unlike the other villages, the actual mine which supported growth was the only "shaft" mine in the George's Creek Valley. The Borden Mining Company was incorporated in 1846 and soon after this date began construction of houses to serve as dwellings for the miners.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Borden Coal Company House, owned by George Whetstone, is located on the north side of Main Street in Borden Shaft, Allegany County near the intersection of Georges Street.

The house basically consists of a one and a half story, three bay wide, rectangular shaped main facade. A one story wing with gabled roof abuts the main block on the rear northern side forming an "L" on the structure. The building is a frame structure originally covered with clapboards that has since been covered with insul brick siding. The entire facade is supported by a low stone foundation with a plain water table. The roof of the building is gabled and is covered with replaced asphalt shingles. The roof is supported by a soffit and exposed rafter ends. Windows in the structure feature double hung wooden sash frames with one over one lights with plain trim. The main entrance is located on the front southern side and exhibits a replaced verticle paneled door with plain trim. The entrance is covered by a three bay end porch with shed roof supported by banistered square columns. One replaced brick chimney is placed on the inside end of the main block.

The house is structurally sound but has been somewhat altered since original construction by the coal company.

Borden Mining Company

STATEMENT OF SIGNIFICANCE

The Borden Mining Company was incorporated in 1846,¹ and operated the only shaft mine in the George's Creek area.² Like the other mining towns in the George's Creek area, the town of Borden Shaft was primarily a company town. That is, the majority of buildings (homes, etc.) were constructed by the company, although miners did have the opportunity to build their own homes if they desired.

The Borden House is typical of the type of home constructed by a coal company in the second half of the 19th century. These houses were usually one and a half stories high with a roofed porch across the front. There were no cellars but the houses were set on low stone foundations. The frame was constructed of timbers mortised and tenoned together with horizontal weatherboard on the outside. Inside they were plastered and painted while the outside was white washed. Rent for such a building cost a miner approximately \$3.50 per month which amounted to a little over 12% of a miner's annual income.³
